GENERAL DESCRIPTION

Our unique BITalino (r)evolution Freestyle kit has all blocks as individual components, making it ideal for wearables. Kits include the basic parts to get started. Our cross-platform OpenSignals software enables instant data visualization and recording, while the APIs provide low-level access from third party and custom applications.

Fig. 1. Blocks are provided as individual components, so you can let your imagination run free and create bespoke devices; available with Bluetooth (Fig. 4) or BLE (Fig. 5).

Fig. 2. BITalino Freestyle kits enable you to easily create wearables and miniaturized biosignal acquisition devices (some components in the image are optional accessories).
