An: Betreff: EFET Legal Committee | WG Hydrogen: H2 Certificates Trade Agreement

Dear members of the WG Hydrogen,

A special thank you goes to the members who participated in the survey on the HTCA.

After that, it appears that there is no sufficient support to continue with the HCTA project in its current format. There seems to be less interest in hydrogen certificates/ H2 GoOs trading.

Members notified us, however, that there is a strong interest in trading contracts for physical green hydrogen and/or ammonia products. We propose to use the summer to clarify internally which H2-related projects or measures (including educational workshops) are of interest and to reconnect in September for a brainstorming call and potentially to initiate new projects.

We will circulate a Doodle for a working group meeting at the end of August. In the meantime, please feel free to share any ideas you have.

Kind regards,

Michaela Duve
Chair of the EFET Legal Committee
