An: Betreff: EFET Legal Committee | WG Hydrogen | Invitation brainstorming and joint project

Dear Members of the EFET Hydrogen Working Group,

We hope you're doing well and staying healthy after the summer break. We are writing to you as a valued member of the EFET Working Group Hydrogen, and we would like to suggest a brainstorming meeting for you. Our goal is to discuss your expectations and needs relating to the output of this Working Group. In addition, we are excited to share a great opportunity for us to collaborate on a significant project.

As we continue our journey towards advancing the hydrogen industry, we have recognised the pressing need to develop a robust template contract for cross-border hydrogen delivery, specifically focusing on ship-based transportation. This initiative builds upon the draft contract that was presented during our Legal Committee Workshop in Amsterdam in June 2023.

To ensure that this contract truly serves the needs of our industry and its stakeholders effectively, we are embarking on a collaborative process with the Hydrogen Council, a global organisation dedicated to accelerating the deployment of hydrogen solutions.

The Hydrogen Council has extended an invitation to the EFET Working Group Hydrogen to participate as a sounding board for the template contract they developed during the previous months. This partnership offers us a unique opportunity to influence the future of cross-border ship-delivered hydrogen delivery contract.

Key Dates for this initiative

Mid-October 2023 - Circulation of the draft contract

End of October 2023 - Joint workshop to walk through the contract. (More details will follow closer to these dates.)

We believe that your valuable insights and contributions are essential to the success of this endeavour. Your company's active involvement will help shape a contract that truly serves the interests of our industry.

Kindly confirm your availability and interest in the brainstorming meeting and the collaborative project with the Hydrogen Council. We will shortly circulate a poll, and your input will assist us in scheduling it conveniently for participants. If you have any specific topics or ideas you would like to discuss during the meeting, please feel free to share them in advance.
